

3 September 2018

Dear Resident

No solar train service September 10 - 15

The Byron Bay Solar Train will not be operating for six days from September 10 through to September 15. Scheduled maintenance involving tamping of the 3km section of track will be undertaken during this time. There will be some noise along the rail corridor, however we are using a much quieter machine than those previously used. We will move down the line as we work on about 500 metres of the rail corridor each day.

To level out the line a track mounted excavator with a tamping head will progressively lift the track and sleepers and repack the ballast. The work will be undertaken between 7:00am and 5:00pm. We apologise for the disruption to the service and the inconvenience to you our neighbours. We will be back up and running on Sunday September 16.

Additional evening services

From September 28 two Friday and Saturday evening return services will be added for the warmer months. These will depart the North Beach Station at 6:00 and 7:00pm and depart the Byron Beach Platform at 6:15 and 7:15pm.

These services are in addition to the year round seven day a week timetable. The Solar Train operates between the North Beach Station at the end of Bayshore Drive and the Byron Beach Platform at the level crossing on Shirley Street in town. There is an hourly return service from 10:00am to 5:00pm, with an additional lunch time return service at 12:30pm.

For timetable or other information please visit www.byronbaytrain.com.au or email us enquiries@byronbaytrain.com.au Thank you.
